CD-75 #2

FD-302 (Rev. 1-28-63) FEDERAL BUREAU OF INVESTIGATION

Date 11/27/63

1

ROLAND EROUILLETTE, 4328 North Rampart Street, advised that sometime during the period July 22, to about August 2, 1963, he was standing at the side door of Waterbury Drug Store, Canal and Camp Streets at approximately 8:00 a.m. waiting for a bus when a group of four, possibly five, white males emerged from the side door of the drug store, the first individual backing out and at the time addressing the remainder of the group not yet through the door. This individual described as average height, about 5'9", heavy build, medium brown hair, fair complexion said, "How are you going to kill the President?". The second individual who emerged was approximately 5'9", 140 lbs., brown hair, fair complexion, and bore the general appearance of photographs in newspapers and television of LEE HARVEY OSWALD.

EROUILLETTE stated that the second individual apparently sensed that he had overheard the statement and no further comment was made. The second individual walked with the group on Camp Street four or five steps and turned and looked at EROUILLETTE, and continued walking with the group on Camp Street in a direction away from Canal Street.

EROUILLETTE could not describe any of the other individuals. He advised that he placed the group in the ages of from 25 to 35 years of age, fair complexion with brown hair, and all were wearing work clothing, his impression being that the clothing was blue denim pants and blue denim shirts for the most part.

EROUILLETTE advised that two or three days later at the same location and at the same time he observed this group recalling in particular the heavy individual and the individual who bears the general appearance of LEE HARVEY OSWALD.

He advised that he is not positive that OSWALD was one of this group. He said he cannot be certain that he would recognize the heavy individual should he again observe him. He said he would not be able to recognize any of the remainder of the group should he again observe them.

He stated that he is basing the period of time when he observed this group as being the time he used this particular route going to work.
